

## Potential Wildfire Research Network SOLUTIONS Pamphlet

4.8 million U.S. homes were identified at high or extreme risk of wildfire, with more than 2 million in California alone. Losses from wildfires added up to \$5.1 billion over the past 10 years.\* IBHS believes improving codes and installation guidance will result in reduced losses. *Insurance Institute for Business & Home Safety (IBHS)*

Deer take Refuge from Horror

Road to Paradise

Welcome to Paradise

We lost it ALL, except Ourselves & MEMORIES

It's ALL GONE

Burned out of HOME

For more info. see [wrn.solutions](http://wrn.solutions). There's an established resistance to bring the appropriate changes about. Unfortunately it will take many hours of volunteer work and money for this technology input. **WRNS** (Wildfire Research Network SOLUTIONS) is a 501(c)3 non profit Institution for PUBLIC BENEFIT thru science and education.
